

Is an energy career for you?

Place a check by the statements that apply to you . . .

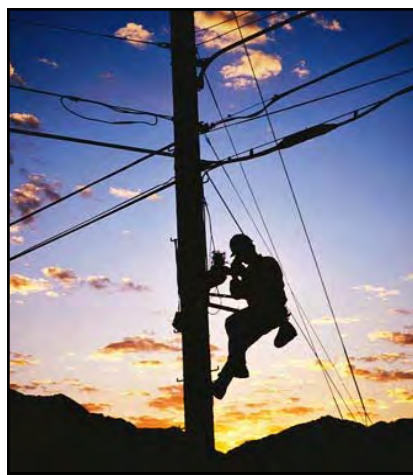

I am between the ages 16-24 and:

- I enjoy working with my hands
- I like figuring out how mechanical things work
- I am not afraid of heights or working in confined spaces
- I am able and willing to lift heavy equipment
- I would enjoy working outside
- I am willing to occasionally work weekends or holidays
- I want a stable career with potential for high earnings

If you are between 16 and 24 and checked three or more of these statements, a career in the energy field might be a good fit for you!

We can help set you on a path to receiving the proper training needed to enter this growing and exciting field.
