

ELIZABETH

When writing about the Next Generation Zone, there is so much to say. My experience was great and I am very appreciative of this program.

When I first went to seek help from the Next Generation Zone, I was enrolling into school, didn't have a job and did not know what to do next or where to turn. My enrolling supervisor at school told me about this program, but I was a bit skeptical about going in to talk to someone. When I got a phone call from Bo at the Next Generation Zone, he was so nice and inviting, so I set up a date and time to meet with him and that's when my life turned for the better.

Bo and this program have helped me in so many ways - such as my phone bill and gas money to get to school and home and to be able to watch over my sick father. Bo helped me get a job that I worked at for three months while going to school through the WEX program. I got help with a portion of my school loan of \$2,500. I also got assistance with placement for my clinical site for school toward the end of the program. When I was ready to do my clinical at Rockwood Clinic, Bo helped me by providing scrubs for me that I needed.

This was a long journey, but it was definitely worth it. I am very thankful that a program like this was available to me. I am also very glad this is available to other people that may be in the same situation as I once was. If I hadn't gotten help from Bo and the Next Generation Zone I most likely would not have been able to finish school or would not have been employed at Rockwood Clinic today.

This program was a blessing and I can't thank Bo or anyone else that was able to help me enough. Anytime I went into the office everyone had a smile on their face and was willing to help. I was with this program for about one year and I would not have changed a thing. This program was life changer and I am happy where I am now.

Thank you Bo and the Next Generation Zone team for your help, this was very much appreciated. You guys are great!
